#### DISCLAIMER

COLOURS SHOWN ON THIS CHART ARE TO BE USED AS A GUIDE ONLY AND SHOULD BE LOOKED AT IN NATURAL SUNLIGHT. COLOURS ILLUSTRATED ARE REPRODUCED AS CLOSE AS MODERN PRINTING TECHNIQUES ALLOW. ALTHOUGH EVERY EFFORT IS MADE TO ENSURE CONSISTENCY, COLOURS MAY VARY FROM BATCH TO BATCH, VARIATIONS IN COLOUR AND SHADING MAY ALSO OCCUR DEPENDING ON THE JOB CONDITIONS AND TEXTURE OF THE UNDERLYING SURFACE. IT IS RECOMMENDED THAT THE COLOUR AND PRODUCT SUITABILITY BE CONFIRMED BEFORE APPLICATION.

THIS SEALER COLOUR CHART IS NOT REPRESENTATIVE OF THE TCM COLOUR OXIDE RANGE.

## CONCRETE & MASONRY SEALERS

Protect and enhance your investment with one of TCM Colour's range of sealers. TCM Colour produce a variety of sealers to achieve different results on different substrates. All TCM Colour Sealers are UV stable.

### **TCM CLEAR SEALER**

This is a solvent based acrylic sealer and is used to achieve a glossy protective coating, recommended for use on coloured concrete or slate. This will achieve a "wet" look finish.

### **TCM HIGH GLOSS CLEAR SEALER**

This is a solvent based acrylic sealer that provides a high gloss protective coating, recommended for use on coloured concrete or slate. This will achieve a "wet" look finish.

### **TCM MATT CLEAR SEALER**

This is a solvent based acrylic sealer used to achieve a matt protective coating, recommended for use on coloured concrete and slate.

### **TCM COLOURED SEALER**

This is a coloured solvent based acrylic sealer which provides a glossy coloured coating especially useful for changing the colour of existing concrete. Please refer to our colour chart for available colours.

### **TCM INVISI-SEAL**

This is a silicone based sealer that does not change the appearance of the substrate. It is as the name suggests, invisible, but provides a protective coating to the substrate.

### **TCM SAME DAY SEALER**

This is a product designed to be applied to green concrete to aid in curing and protect the surface from the earliest point possible. As it is a softer resin, TCM Colour recommends using either the TCM Clear or Coloured sealer as a second coat to improve durability.

### **TCM EPOXY SEALER**

A hard tough finish for masonry floors and structural steel. Available in clear and coloured. Please refer to our colour chart for available colours.

### **TCM ULTRA NON SLIP BEADS**

Used with TCM Colour's solvent based acrylic sealers to provide greater grip.
